

HMM-120H

BEND - SHEAR - PUNCH

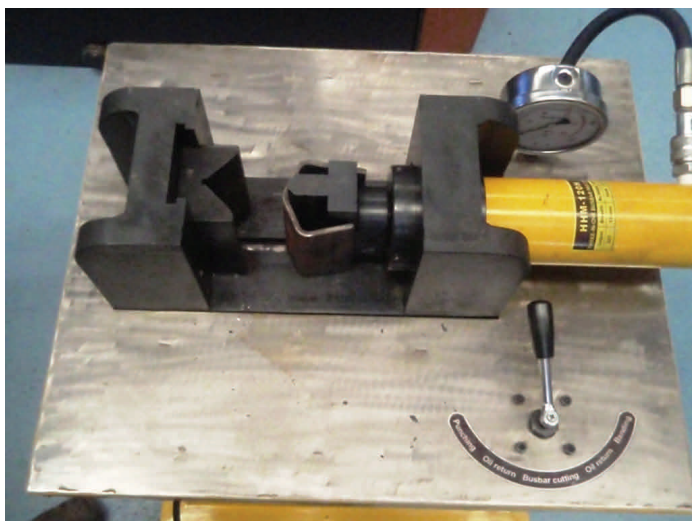

A simple, easy to use labour saving machine for bending, punching & shearing numerous types of materials. Ideal for processing materials to make bends for brackets etc.

Capacity: 20 Tonnes
Stroke: 90mm
Max Thickness: 10mm mild steel
Max Width: 120mm
Machine Weight: 140kg
Power: 220V Single Phase

Dimensions:
L: 650mm
W: 550mm
H: 1000mm

Bending Tool:
Vee: 60mm x 90 degrees
Shearing Tool: 1
Punching Dies:
11.1mm
14.3mm
17.5mm
20.6mm

The machine has a three position control lever.

- Busbar & Flat bar cutting
- Punching
- Shearing

Tools are changed quickly and easily with minimal tools.

The machine is fully hydraulic with relief valve overload protection and pressure gauge.
